Irradiation in the Production, Processing and Handling of Food

Dear Mr. Hubbard:

I am an irate citizen!

I will never knowingly eat irradiated substances. You must know that polls show that the overwhelming majority of Americans will never knowingly eat irradiated substances.

Therefore you, evidently at the request of your corporate sponsors, the food processing and nuclear industries, propose to permit irradiated food not to be labeled as such.

That is disgusting, immoral and, most probably, illegal.

I plan to buy less of what you consider to be food, buy largely "organic", which you have so far failed to subvert, grow more real food in my own garden, and work against this government and for democracy in every way I can.

Sincerely,
